| Maths | We use the mixed year group Essential Maths for Years 1/2. Termly diagnostic assessments take place. Maths fluency is taught at <br> least three times each week, sometimes as an extension of the maths lesson and sometimes separately. Whilst the Learning <br> Sequences are the same, the lessons are differentiated according to year group expectations. For example whilst Year 1 pupils <br> recognise and name common 2D and 3D shapes including rectangles, circles and triangles/ 3D shapes including cuboids, pyramids <br> and spheres Year 2 identify and describe the properties of 2D shapes, including the number of sides and symmetry in a vertical <br> line/ identify and describe the properties of 3D shapes, including the number of edges, vertices and faces. |
| :--- | :--- |
| Nursery | Number <br> Develops fast recognition of up to 3 objects, without having to count them individually (subitising). <br> Recites numbers past 5. <br> Says one number for each item in order: 1,2,3,4,5. <br> Knows that the last number reached when counting a small set of objects tells you how many there are in total (cardinal principle). <br> Shows 'finger numbers' up to 5. <br> Links numerals and amounts, e.g. showing the right number of objects to match the numeral, up to 5 <br> Experiments with their own symbols and marks as well as numerals. <br> Solves real world mathematical problems with numbers up to 5 <br> Compares quantities using language: 'more than', 'fewer than'. <br> Numerical Patterns <br> Talks about and identifies the patterns around them, e.g. stripes on clothes, designs on rugs and wallpaper. <br> Uses informal language like 'pointy', 'spotty', 'blobs', etc. <br> Extends and creates ABAB patterns - stick, leaf, stick, leaf. <br> Notices and corrects an error in a repeating pattern. <br> Begins to describe a sequence of events, real or fictional, using words such as 'first', 'then...' <br> Shape, Space and Measure <br> Talks about and explores 2D and 3D shapes using informal and mathematical language, e.g. 'sides', 'corners'; 'straight', 'flat', <br> 'round'. <br> Understands position through words alone, e.g. "The bag is under the table," - with no pointing. <br> Describes a familiar route. Discusses routes and locations, using words like 'in front of' and 'behind'. <br> Makes comparisons between objects relating to size, length, weight and capacity. <br> Selects shapes appropriately, e.g. flat surfaces for building, a triangular prism for a roof, etc. <br> Combines shapes to make new ones, e.g. an arch, a bigger triangle, etc. |

## Aycliffe Drive Maths Planning in Year Groups

|  | Count 0-5 in everyday contexts <br> Compare amounts <br> Compare weight <br> Compare size <br> Positional Language | Recite numbers past 5 <br> Know that the last number reached when counting a small set of objects tells you how many there are in total ('cardinal principle') <br> Understand position through words alone <br> Select shapes appropriately: flat surfaces for building, triangular prism for roof etc. <br> Talk about and identify the patterns around them Extend and create $A B A B$ patterns | Say one number for each item in order, 1-5 \& show finger numbers up to 5 <br> Link numerals and amounts <br> Solve real world mathematical problems with numbers up to 5 <br> Talk about and explore 2D and 3D shapes (for example, circles, rectangles, triangles and cuboids) using informal and mathematical language <br> Describe a familiar route and location <br> Make comparisons between objects relating to size, length, weight and capacity Combine shapes to make new ones e.g. an arch to make a bigger triangle <br> Notice and correct an error in a repeating pattern <br> Begin to describe a sequence of events, real or fictional |

| Reception | Children will have a deep understanding of number to 10, including the composition of each number. Subitise (recognise quantities without counting) up to 5 . Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10 , including double facts. Verbally count beyond 20, recognising the pattern of the counting system. Be able to compare quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity. Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally. They will use everyday language to talk about size, weight, capacity, position, distance, time, and money to compare quantities. Create and describe patterns. Explore characteristics of everyday objects and shapes and use mathematical language to describe them. Use money with increasing confidence. |  |  |

|  | Pupils work in small groups with adults targeting key content from our agreed curriculum. Maths Learning opportunities are threaded through nearly all aspects of continuous provision. |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Recognise, count, and order numbers to 5 and beyond. 1 more 1 less. <br> Subitising - notice when patterns are the same or different, make the same values, identify more or less. <br> Counting Skills- Counting reliably using names in order with 1-1 correspondence. <br> Say which number is 1 more or 1 less than a given number. <br> Ordering and recognising numbers <br> Comparison - Measures. Talk about size weight and position. <br> Pattern recognition, comparison, and identification <br> Classification - use language to describe everyday shapes and use mathematical language to describe them. <br> Counting to compare numbers. <br> Count on or back to find answer. | Spatial Thinking - De and language linked in movements and Ordering and Estima with numbers 1-20. Know the position o their relationship to Say which number is <br> Regrouping parts to Finding whole and $m$ Automatic recall of know some number Use quantities to ad single digit numbers <br> Begin to count confi recognising patterns system. | elop spatial thinking o position, direction mbols ${ }^{\text {Q Magnitude }-~}$ ng ${ }^{2}$ Count reliably <br> numbers to 10 and ther numbers. 1 more /1 less. <br> nd total number. issing parts. umbers to 5 and onds to 10. and subtract two <br> ently beyond 10 , in the number | Solve simple math problems. <br> Doubling, halving, <br> Begin understandi numbers. <br> Begin to secure un equal and unequal <br> Recognise when a Consolidation of le <br> Count reliably with place them in orde number is one mo Solve simple math problems. <br> Ten and some mor beyond 20 . <br> Understand patter numbers. <br> Understand group | natical <br> d sharing odd and even <br> rstanding of roups. are is fair. ning. <br> umbers 1-20, and say which or one less. natical counting in consecutive <br> f ten |
| Year 1 | Positional language <br> and sequencing, <br> Subitising leading to <br> more and fewer, Additive Reasoning, <br> the understanding <br> and language of <br> operations, part <br> Number magnitude, <br> estimation and <br> comparison, place equality and <br> comparison,  | Geometry 1, regrouping to add and subtract, strategy choices for addition and subtraction problem solving | Doubling and halving, multiplication counting multiples and repeated addition, multiplication | Money, Fractions, problem solving all four operations, time turns and telling the time, time drawing hands on | Measures and reading scales, statistics, geometry 2, place value with larger numbers, |

We use the mixed year group Essential Maths for Year1/2. Termly diagnostic assessments take place. Maths fluency is taught at least three times each week, sometimes as an extension of the maths lesson and sometimes separately. Whilst the Learning Sequences are the same the lessons are differentiated according to year group expectations For example under Number and Place Value Reasoning 1 Year 3 would learn place value in a three digit number, to find 10 or 100 more or less and to compare and order numbers up to 1,000 . Year 4 would learn place value in a four digit number, to identify, represent and estimate numbers using different representations and to round any number to the nearest 10-100-1,000.
